Roberto Behar

Professor in Practice

Roberto Behar multidisciplinary practice weaves together visual arts, architecture, design and the city. Together with his partner Rosario Marquardt he is the founder of R & R Studios. Celebrated, as one critic put it, as “architects of hope” their works propose encounters of stories and spaces, which alternate between the personal and the public, the quotidian and the extraordinary, the poetical and the political. Behar & Marquardt’s works erase boundaries between art and life and suggest “imaginary solutions” for a better world.
