Michelle Wachs – Publications

**Action of the symmetric group on the free LANKe: a CataLANKe Theorem**
(with Tamar Friedmann, Philip Hanlon, Richard P. Stanley)

**Gamma-positivity of variations of Eulerian polynomials**
(with John Shareshian, 29 pages)

**From Poset Topology to q-Eulerian Polynomials to Stanley’s Chromatic Symmetric Functions**

**Chromatic quasisymmetric functions**
(with John Shareshian, Advances in Math, 295 (2016), 497-551)

**On the (co)homology of the poset of weighted partitions**

**On the poset of weighted partitions**
(with Rafael Gonzalez D’Leon, DMTCS Proceedings, 0 (2013), 1029-1040)

**Rees products and lexicographic shellability**
(with Svante Linusson and John Shareshian, J. Combinatorics, 3 (2012) 243-276)

**Chromatic quasisymmetric functions and Hessenberg varieties**

**Unimodality of Eulerian quasisymmetric functions**

**Eulerian quasisymmetric functions and cyclic sieving**
(with Bruce Sagan and John Shareshian, Advances in Applied Math., 46 (2011), 536-562)

**Poset homology of Rees products and q-Eulerian polynomials**
(with John Shareshian, Electronic J. Combinatorics 16 (2009), R20, 29 pages)

**Eulerian quasisymmetric functions**
(with John Shareshian, Advances in Math. 225 (2010), 2921-2966)
Top homology of hypergraph matching complexes, $p$-cycle complexes and Quillen complexes of symmetric groups
(with John Shareshian, J. Algebra 322 (2009), 2253-2271)

On Sequentially Cohen-Macaulay Complexes and Posets
(with Anders Bj"orner and Volkmar Welker, Israel J. Math. 169 (2009), 295-316)

$q$-Eulerian Polynomials: Exceedance Number and Major Index

Poset Topology: Tools and Applications

Torsion in the Matching Complex and Chessboard Complex
(with John Shareshian, Advances in Math. 212 (2007), 525-570)

Poset Fiber Theorems
(with Anders Bj"orner and Volkmar Welker, Trans. AMS 357 (2005), 1877-1899)

Topology of Matching, Chessboard and General Bounded Degree Graph Complexes
(Algebra Universalis Special Issue in Memory of Gian-Carlo Rota, Algebra Universalis, 49 (2003) 345-385)

On the Property M Conjecture for the Heisenberg Lie Algebra

Geometrically Constructed Basis for Homology of Partition Lattices of Types A,B and D
(with Anders Bj"orner, Electronic J. Combinatorics 11 (2004), 29 pages)

Homology of Matching and Chessboard Complexes - Extended Abstract
(with John Shareshian, FPSAC/01, 7 pages)

Combinatorial Laplacian of the Matching Complex

Matching complexes, bounded degree graph complexes and weight spaces of GL_n-complexes

Cohomology of Dowling lattices and Lie (super)algebras
A FEW PRE-2000 PAPERS

Obstructions to shellability
(Discrete and Computational Geometry 22(1999) 95-103)

Whitney homology of semipure shellable posets

On the (co)homology of the partition lattice and the free Lie algebra
(Selected papers in honor of Adriano Garsia (Taormina, 1994), Discrete Math, 193 (1998) 287-319)

Shellable nonpure complexes and posets, II
(with A. Björner, Trans. AMS, 349(1997) 3945-3975)

Shellable nonpure complexes and posets, I
(with A. Björner, Trans. AMS, 348(1996) 1299-1327)

The homology representations of the k-equal partition lattice
(with S. Sundaram, Trans. AMS, 349(1997) 935-954)

On q-derangement numbers
(Proc. AMS, 106(1989) 273-278)

Flagged Schur Functions, Schubert Polynomials, and Symmetrizing Operators
(J. Combin. Th., 40(1985) 276-289)
