VI. Teaching

28. *Teaching Awards Received:* N/A

29. *Teaching Specialization:*

I am deeply committed to student-centered teaching to optimize the prevention and treatment of debilitating psychiatric disorders which frequently impair the management of other chronic medical conditions. In my role as an Associate Professor in the Department of Public Health Sciences, I support training in HIV/AIDS prevention, community-based interventions, and clinical research methods. Ultimately, I aim to prepare the next generation of public health practitioners and prevention researchers.
