22. Funded Research Performed (Past Five Years - 2011-2016):

Shafazand (PI) 10/2013-9/2017
DOD/SCIRP

Neurocognitive decline and sleep-disordered breathing after SCI. The goal of this project is to examine the relationship between cognitive function and sleep disordered breathing in persons with chronic SCI
Role: Co-Investigator (5% Effort) Total Costs: \$1,850,000

H133A120099 Johnson-Greene (PI) 0/1/012-9/30/17
DOE/NIDRR

South Florida Traumatic Brain Injury Model System (SF-TBIMS). This project seeks to collect outcome data for a national dataset on traumatic brain injury and to conduct site-specific research on traumatic brain injury: 1) Evaluation and Intervention of Sleep Disordered Breathing (SDB) In Persons with Traumatic Brain Injury; 2) Evaluating Assessment Methods for Pain in Persons with Traumatic Brain Injury.
Role: PI (30% Effort) Total Costs: \$2,134,623

H133N110003 Cardenas (PI) 10/1/11-9/30/16
DOE/NIDRR

South Florida Spinal Cord Injury Model System

This project seeks to collect outcome data for a national dataset on spinal cord injury and to conduct site-specific research on spinal cord injury relating to longitudinal changes in shoulder pathology after spinal cord injury and the effects of exercise on shoulder pathology as measured by ultrasound.

Role: Consulting Faculty (0% Effort) Total Costs: \$2,220,000

Maudsley (PI) 8/1/11-8/31/12

Interdisciplinary Research Development Initiative (IRDI) – Univ. of Miami
 Characterization of TBI and PTSD by MR Metabolic Imaging

Role: Co-Investigator (5% Effort) Total Costs: \$98,786

K23HD052774 Kortte (PI) 3/1/07-2/28/12

NIH/NICHHD

Anosognosia for Hemiplegia: Neural Basis, Psychological Correlates, and Recovery. This project seeks to determine what brain regions are associated with persistent anosognosia for hemiparalysis (AHP) and the presence of co-morbid psychological processes.

Role: Consulting Faculty (0% Effort) Total Costs: \$672,000

K23AA013898 Johnson-Greene (PI) 7/1/03-6/30/08

NIH/NIAAA

Interface Between Alcohol and Recovery from Disabilities. This project seeks to determine the impact of problem drinking on recovery from stroke including its impact on post-stroke depression, cognitive recovery, adverse events, and stroke recurrence.

Role: Principal Investigator (75% Effort) Total Costs: \$875,300
